Cybersecurity Insurability Services

As the frequency of ransomware and other cyber attacks accelerates, cybersecurity insurance that reliably and affordably protects your organization is vital. Meanwhile, insurance premiums continue to rise, with some organizations unable to get coverage at all.

With a deep understanding of cybersecurity insurance criteria and best practices, along with the skills to put those best practices into action, Edge's team of nonprofit experts is here to help.

CYBERSECURITY INSURABILITY ASSESSMENT

Our assessment calls upon a deep understanding of cybersecurity insurance requirements and common cybersecurity frameworks to analyze your organization's readiness to apply for insurance. Our assessment:

- Analyzes your organization's technology infrastructure and policies using a checklist of cybersecurity insurers' requirements

- Delivers a report with actionable recommendations to improve your insurability, minimize premium increases, and enhance cybersecurity overall

- Provides documented evidence of the organization's current cybersecurity efforts

SERVICES TO IMPROVE CYBERSECURITY INSURABILITY

One of our virtual Chief Information Security Officers will partner with your team time improve cybersecurity insurability by:

- Leading the remediation process documented by a Cybersecurity Insurability Assessment

- Partnering with your team to apply for insurance coverage more effectively

- Participating in the negotiation process with insurers to best represent your organization's security efforts and get the best rates and coverage possible

- Conducting regular vulnerability assessments to ensure compliance with insurance standards and security best practices
