

Keeping Pace with Your Institution's Digital Learning and Instructional Services Needs

ACHIEVING LEARNER-CENTRIC SUPPORT

The unprecedented growth and need for digital learning has been seen across the education community, with many institutions seeking solutions and support that could address changing needs of their students and staff.

EDGE SOLUTIONS

EdgeLearn represents an evolving suite of learner-centric technology solutions that provide faculty, instructional designers, educational technologists, and technology support personnel the platforms and tools they need to create a personalized and powerful learning experience for students including:

Instructional Design

Design, develop, and manage your online course offerings at any stage in the process, from the start-to-finish design of brand new curriculum to cost-effective "instructional design on demand" services.

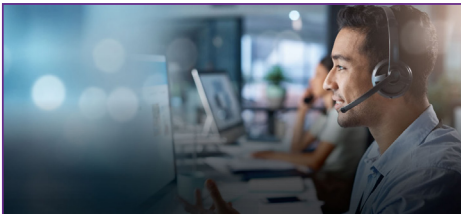

Professional Development

Build targeted training workshops for your faculty and staff with clear learning objectives in learner-centric, flexible models.

Quality Assurance

Ensure your course offerings and web properties meet quality standards, including online course evaluation against a variety of industry-standard rubrics.

Service Management

Deliver timely and quality answers to your faculty, staff, and students with incident and service management support, ranging from LMS ticketing to web content management.

Digital Accessibility Support

Ensure the needs of differently abled members of your learning community are met consistently and proactively with accessibility support including assessments, skill-building workshops for faculty & staff, and strategic planning.
