

YOU ARE INVITED

Leveraging National Supercomputing Resources for Research and Education

November 14, 2024 12:00-1:00 ET (Virtual event)

Presented by Stephen Deems

Director of Strategic Initiatives, Pittsburgh Supercomputing Center (PSC)

The essential role of Cyberinfrastructure (CI) in scientific research will be discussed, highlighting the national resources available to support CI. Specifically, the [NAIRR Pilot](#) and the [NSF-funded ACCESS Allocations](#) program will be explored showcasing how researchers and educators can take advantage of advanced computing systems—completely free of charge!

**Please join us for this informative session and feel
free to share the event information with your networks.**

REGISTER HERE »

**We encourage you to attend and learn more about how you can leverage
advanced computing systems to enhance your work!**

Please contact [Forough Ghahramani](#) for additional information.

We are grateful for support from the National Science Foundation

CC* Regional Networking: Connectivity through Regional Infrastructure for Scientific Partnerships, Innovation, and Education (CRISPIE) project (NSF OAC- NSF0311528)
